

Coffee Shop Sales Analysis

Objective :

The main objective of this project is to analyze retail sales data to gain actionable insights that will enhance the sales of the Coffee Shop.

Recommended Analysis :

1. How do sales vary by day and hour?

Sales are highest on **Friday (21,701)**, **Monday (21,643)**, and **Thursday (21,654)**. Lowest sales are on **Saturday (20,510)**.

2. Peak time for sales activity

Peak sales time is **morning hours, especially 8 AM–10 AM**, with **10 AM** having the highest quantity ordered.

3. Total sales revenue

Overall total sales revenue is **\$6,98,812.33**.

Monthly filter includes **January to June**, so the dashboard is showing total revenue for these months combined.

4. Sales across store locations

Best performing location is **Hell's Kitchen** with around **\$2,36,511.17** sales and **50,735** footfall.

Then **Astoria** with **\$2,32,243.91** and **Lower Manhattan** with **\$2,30,057.25**.

5. Average price/order per person

- **Average bill/person: 4.69**
- **Average order/person: 1.44**

6. Best-selling products by revenue

Top products based on sales are:

1. **Barista Espresso — \$91,406.20**
2. **Brewed Chai Tea — \$77,081.95**
3. **Hot Chocolate — \$72,416.00**
4. **Gourmet Brewed Coffee — \$70,034.60**

5. Brewed Black Tea — \$47,932.00

7. Sales by product category and type

Category-wise, **Coffee contributes the highest sales share at 39%**, followed by **Tea at 28%** and **Bakery at 12%**.

Other categories like Drinking Chocolate, Coffee Beans, Flavours, and Branded products contribute smaller shares.

Final insight

The coffee shop performs best during **morning hours**, especially around **8–10 AM**. **Coffee and tea products drive most revenue**, and **Hell's Kitchen** is the strongest store location. The business should focus promotions and staffing around morning peak hours.
